XTREME SECURITY

# PREFACE

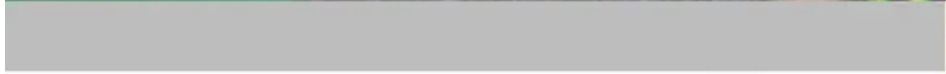

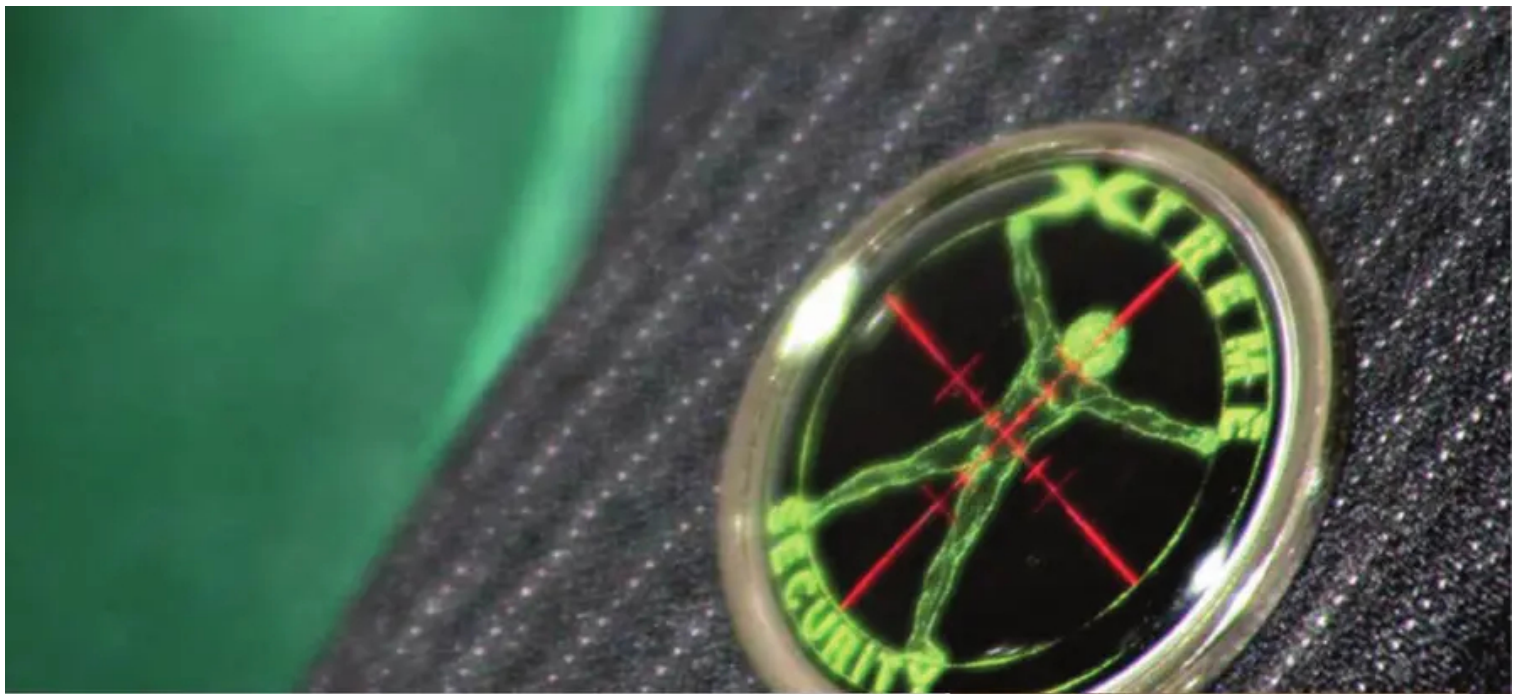

## PREDRAG OŠTRIĆ FOUNDER

With over 30 years of excellent operational experience, Redrag has been closely involved in security organization for multiple High-Profile Individuals. His service duty includes various Governmental Officials; President Clinton, George Bush, Emirs, Basar Asad, the Danish Queen, Joe Biden, President Putin and many more. a Special Police Officer, he served his country during the Croatian War of Independence. After the war, he became a part of a team for the protection of the President of Parliament. He rose to the rank of the Head of Security of the second Croatian President at Office of Special Security Affairs (equivalent of the US Secret Service). In this function, he duly cooperated with domestic and foreign security services. His connections with important persons worldwide, has been of immense value for his outfit in the Xtreme Security Company.

## TOMISLAV PAHLJINA CEO

A Security Operative with years of experience, and had the honor of serving in the Office of the President within the Croatian Ministry of Defense for 6 years. He gained excellent experience within private security industry, in the theatres of Europe, Afghanistan, Iraq and all-around Africa. After the military he was trained as an Executive Protection Specialist in London, by the former bodyguard of the late princess Diana, Ken Warfe. He then joined the anti-piracy program at Horn of Africa. After two years in Africa, he went to Afghanistan for the American company Sratex, before joining another company and their VIP team in protection of Lukoil's Executive Manager in Iraq. He then decided to leave Middle East and open his own private security company with his colleague Predrag.

**I**n today's chaotic world no one is safe anymore. If we talk about ordinary street crime such as a pick pocketing or threat from various militancy groups / extremists, no one is safe, and targets are not just politicians or celebrities, but all layers of society. Executive Protection within Europe is most of the time unarmed job, and only weapon we use is our brain! Having a situational environmental intelligence, good communication skills, fluidity and, flexibility in decision making, makes our operatives good Executive Protection Agents. Our security teams not only serve as a deterrent against crime, they are precise and professional and have the ability to discreetly and rapidly address any security issue that may arise. Our key ability is the early identification of potential

threats before they occur. This enables us to make effective decisions, which prevent the opportunity to inflict damage or harm. Xtreme Security provide personnel that understand the industry trends and have the unique ability to blend into their surroundings but also show a physical deterrent when necessary. Within Executive Protection there are a number of different specialist fields and experiences, from working with Corporate Executives to Celebrities, and Families with children. Each client requires a different mindset and selection of skills, and can involve different qualifications such as a Pediatric First Aid qualification for instance. Our team consists of security professionals with different skills and qualifications to suit anyone's needs, and we can deploy both male and female operatives. As our motto said; Any Task, Any Time, Anywhere!

Tomislav Pahljina, COO

# ABOUT US

“We create a vibe that encourages our clients, who we call the Elite, to live every moment more intensely. We bring the creative power, stretching the realm of possibility and constantly push the boundaries of what security can be.”

## XTREME SECURITY FOR PROTECTION SERVICES

Xtreme Security is a company made up of highly talented, diverse, and motivated individuals who came together for a common purpose; Providing High Quality services for Domestic & Foreign Dignitaries, Corporate Executives and High Profile Individuals (VIPs) in the Public Eye.

Our vision is to provide a peace of mind to our clients, while protecting them and their brand. To make them more productive by saving their

time through a personal concierge services, and to make them comfortable by preserving their needs for privacy as much as possible.

We are the Executive Protection Specialists whose main responsibility is to protect your life, your loved ones, your brand, and your privacy. Additionally, we take care of logistics, advanced security, travel security, coordination with other parts of your organization, and of all other time saving personal and business concierge services.

## MISSION STATEMENT

Maximum dedication to our duties and customer satisfaction is our ultimate goal. This philosophy guides our entire structure and is the driving force in our every decision. Guaranteeing a safe & secure environment, providing sound decisions that result in ultimate satisfaction for all our clients. We strive to observe, interpret, decide and act. We are firm in our conviction that our duty is to preserve life, property, risks and maintain a professional approach to a meaningful and cost effective solution. Performance guaranteed!

## OUR OPERATIVES

Do you need a Confident Person with a High Standard of Integrity? Do you need Discretion? Protecting Client Information and Privacy is very important to us. We place great importance on the Integrity and Reliability of our Close Protection Officers. Everyone hired for any security position undergoes an extensive background check of criminal history to ensure that all employees are: Reliable, Trustworthy, of Good Conduct and Character.

Our security teams not only serve as a deterrent against crime. They are precise and professional and have the ability to discreetly and rapidly address any security issue that may arise. Our key ability is the early identification of potential threats before they occur. This enables us to make effective decisions, which prevent the opportunity to inflict damage or harm.

Xtreme Security provides personnel that understand the industry trends and have the unique ability to blend into their surroundings but also show a physical deterrent when necessary.

"Our standard go far beyond typical bodyguard service. We will manage every aspect of each assignment to ensure the highest standards of quality and safety are adhered to."

We supply both, male & female security professionals to suit any needs or situations. Our Executive Protection Agents are highly educated operatives, with great understanding of social dynamics, but first and foremost a security professionals with good character and persons with good soft skills. Having a situational environmental intelligence, good communication skills, flexibility in decision making and fluidity, makes our operatives excellent Executive Protection Agents. In addition to hard skills that all our agents must

have in order to join our team initially, and those they have acquired on a Security Driving Training, Close Protection Training, Medical Training, all our agents must pass some other specialist training prior working for us. That specialization is done partnership with some of the best academies within USA; like the Executive Protection Institute, Bravo Research Group, and some others. They assist in the constant improvement of our employees' knowledge through their mentoring and training programs.

# RISK MANAGEMENT

## THREAT & RISK ASSESSMENT

Security must make sense!

Our company assets are covered effectively by all members of staff and our procedures are clear and justified. Cooperation and contribution at all levels is required and procedures must be fully integrated with the business operation.

Threat awareness, evaluation and avoidance is the key to effective protection.

Our threat assessment is clear, logical, accurate, relevant and comprehensive. With the addition of reconnaissance and background checks which in essence are risk assessments of both the location you will visit and the people you will encounter there, we ensure all bases are covered.

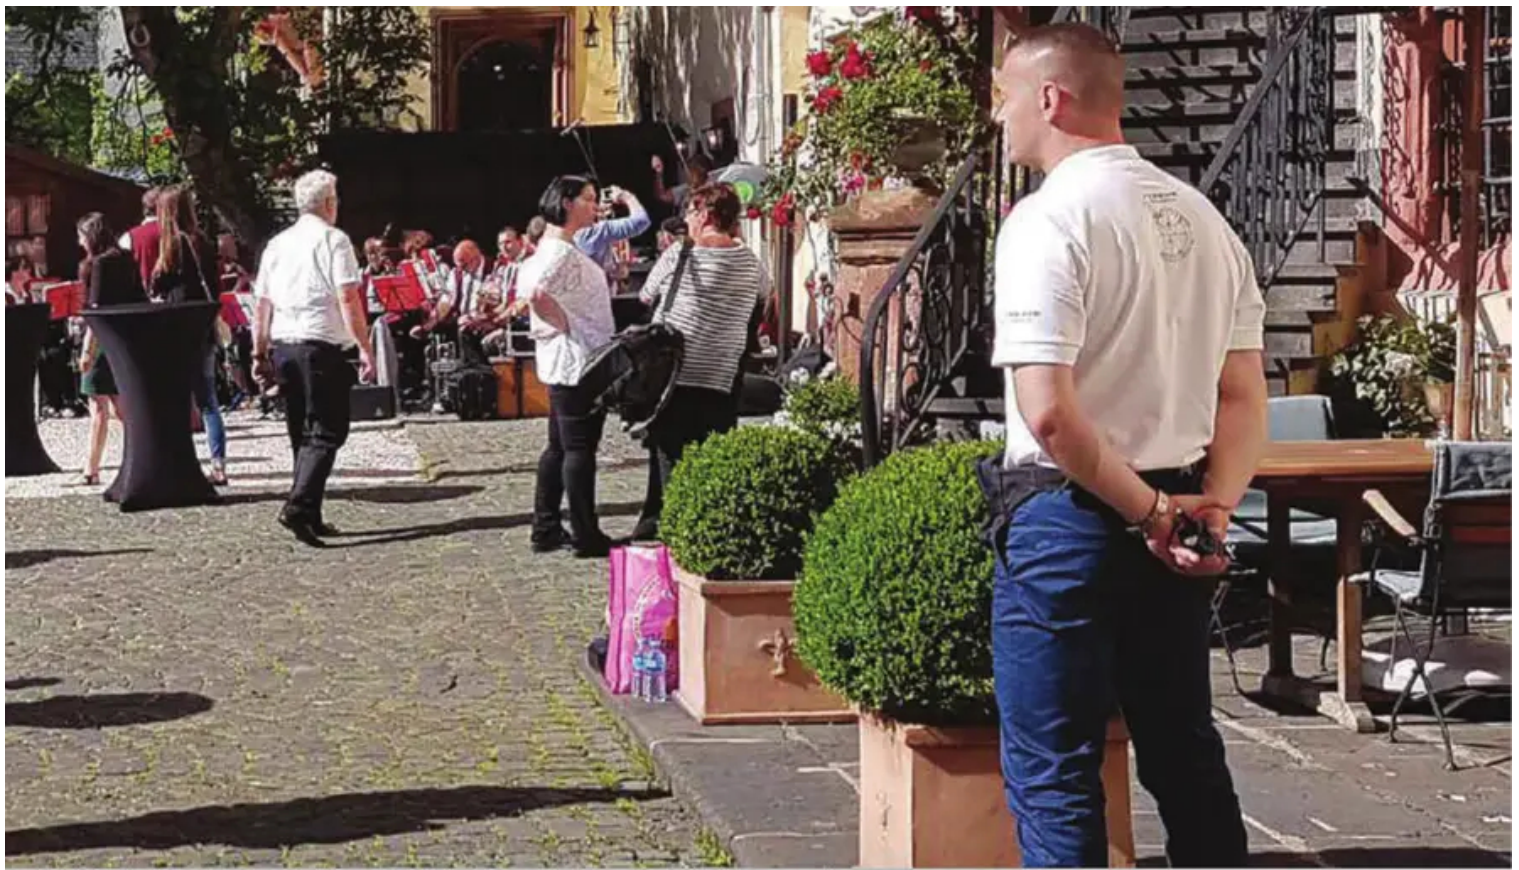

When managing the possibility of a threat, we at first do our very best to AVOID the threat in the first place, and then try to ESCAPE the threat. If extraction from the scene is not achievable, only then will we CONFRONT the threat. In the world of Close Protection security, the basis of all planning for the protection of the client, is derived from threat assessment.

A threat assessment defines the current situation, historic development and the methodology of the threat in which we place our principal. Once prepared, the assessment is not concluded or static, but forms the basis of a dynamic, ever-changing assessment as more information appears. A threat assessment can be done on an entire country or simply an individual; in every case it has many treads and facets.

The "Threat" is external and constant. Apart from per-emotion there is little can be done about it.

"Risk" is what we are paid to reduce by taking appropriate measures. The risk is NOT constant. 95% of the protection of a VIP consists of waiting, planning, 'what if-ing' and carrying out the day to day duties of normal life in anticipation of the 5% of actions, thinking under pressure and keeping the VIP safe.

The anticipation and planning consume 100% of our attention!

## OPERATIONAL INTEL & PLANNING

Close Protection operations require correct planning to establish the correct drills and profiles for each threat. Within an established operation there may be a requirement to plan for a particular event or trip that is not normally catered for. We regard this planning to be of high priority.

A well planned operation significantly reduces anything left to chance and permits the operation to be conducted in a smooth and professional manner. Our most important aspect of VIP protection is preparation. Good preparation allows us to be pro-active and in charge, not always having to react to a crisis. Preliminary security arrangements at all the sites to be visited by the VIP are made by our advance teams.

This is the role of our Security Advance Party (SAP). Our SAP carries out a site survey to identify areas requiring security upgrades to assure the visit of the VIP progresses smoothly and safely, ensuring where possible that the detail knows all security arrangements prior to the actual visit.

## COUNTER SURVEILLANCE

Major component of criminal and terrorist planning is prior surveillance of their target.. We are constantly alert to the fact that someone could have the principal under surveillance. Failure to understand surveillance methods would mean that we would be unaware of the criminals watching you and therefore place you in great danger.

Counter surveillance is our responsibility, there are certain drills and techniques which our teams can employ if they think you are being subjected to surveillance. However proper planning can assist in our counter surveillance plan.

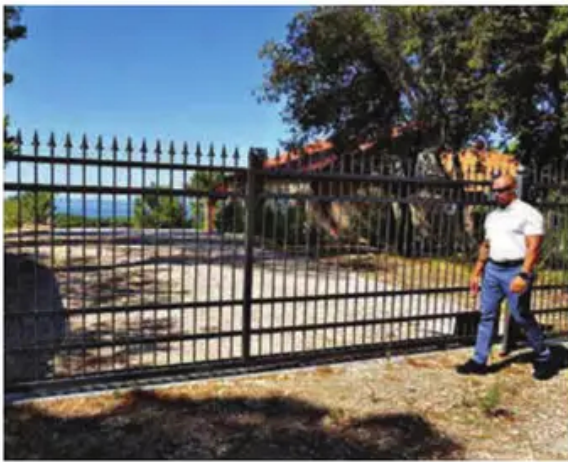

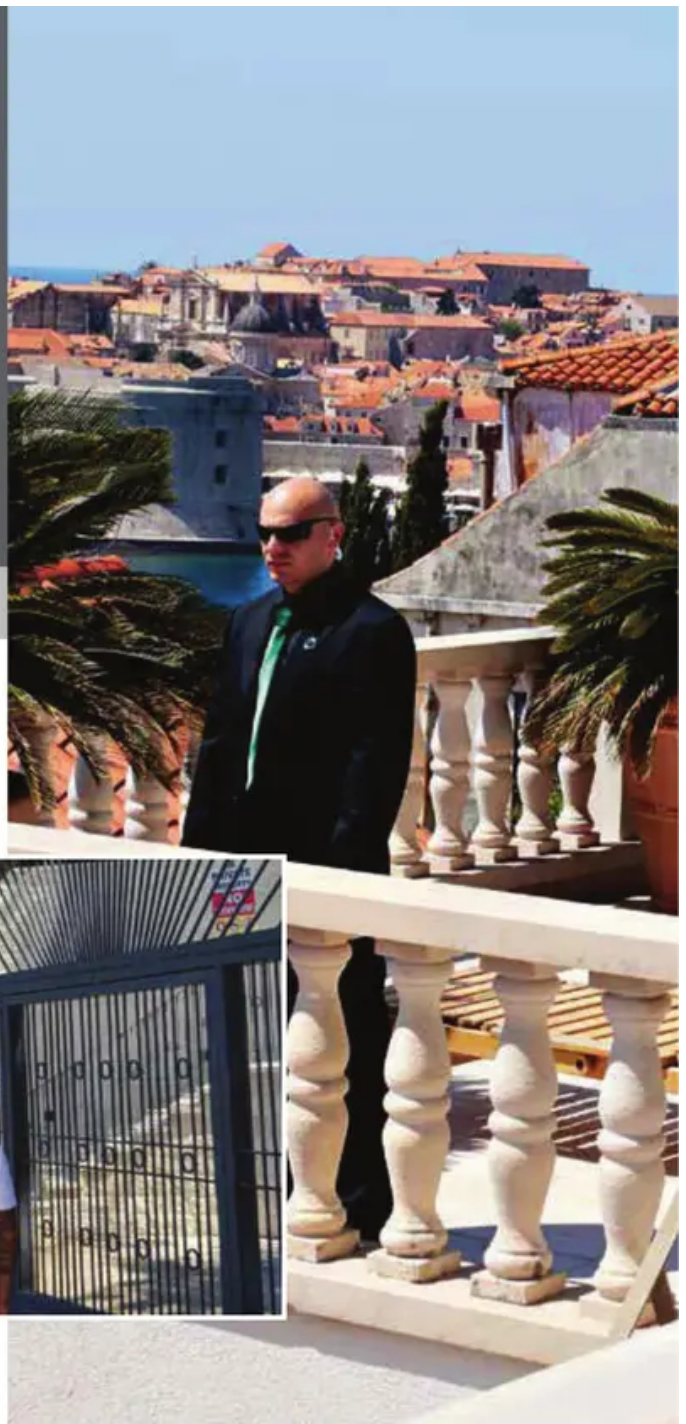

Who can impose surveillance?

Criminal – organized criminals often carry out recess prior to the execution of the crime.

Press – to obtain a story, whether good or bad.

Too many times the close escort has little security in depth, there is a tendency to close in to the VIP and not be aware of their surroundings. Even an attack by a 'nutter' will have warning signs that must be picked up by the escort.

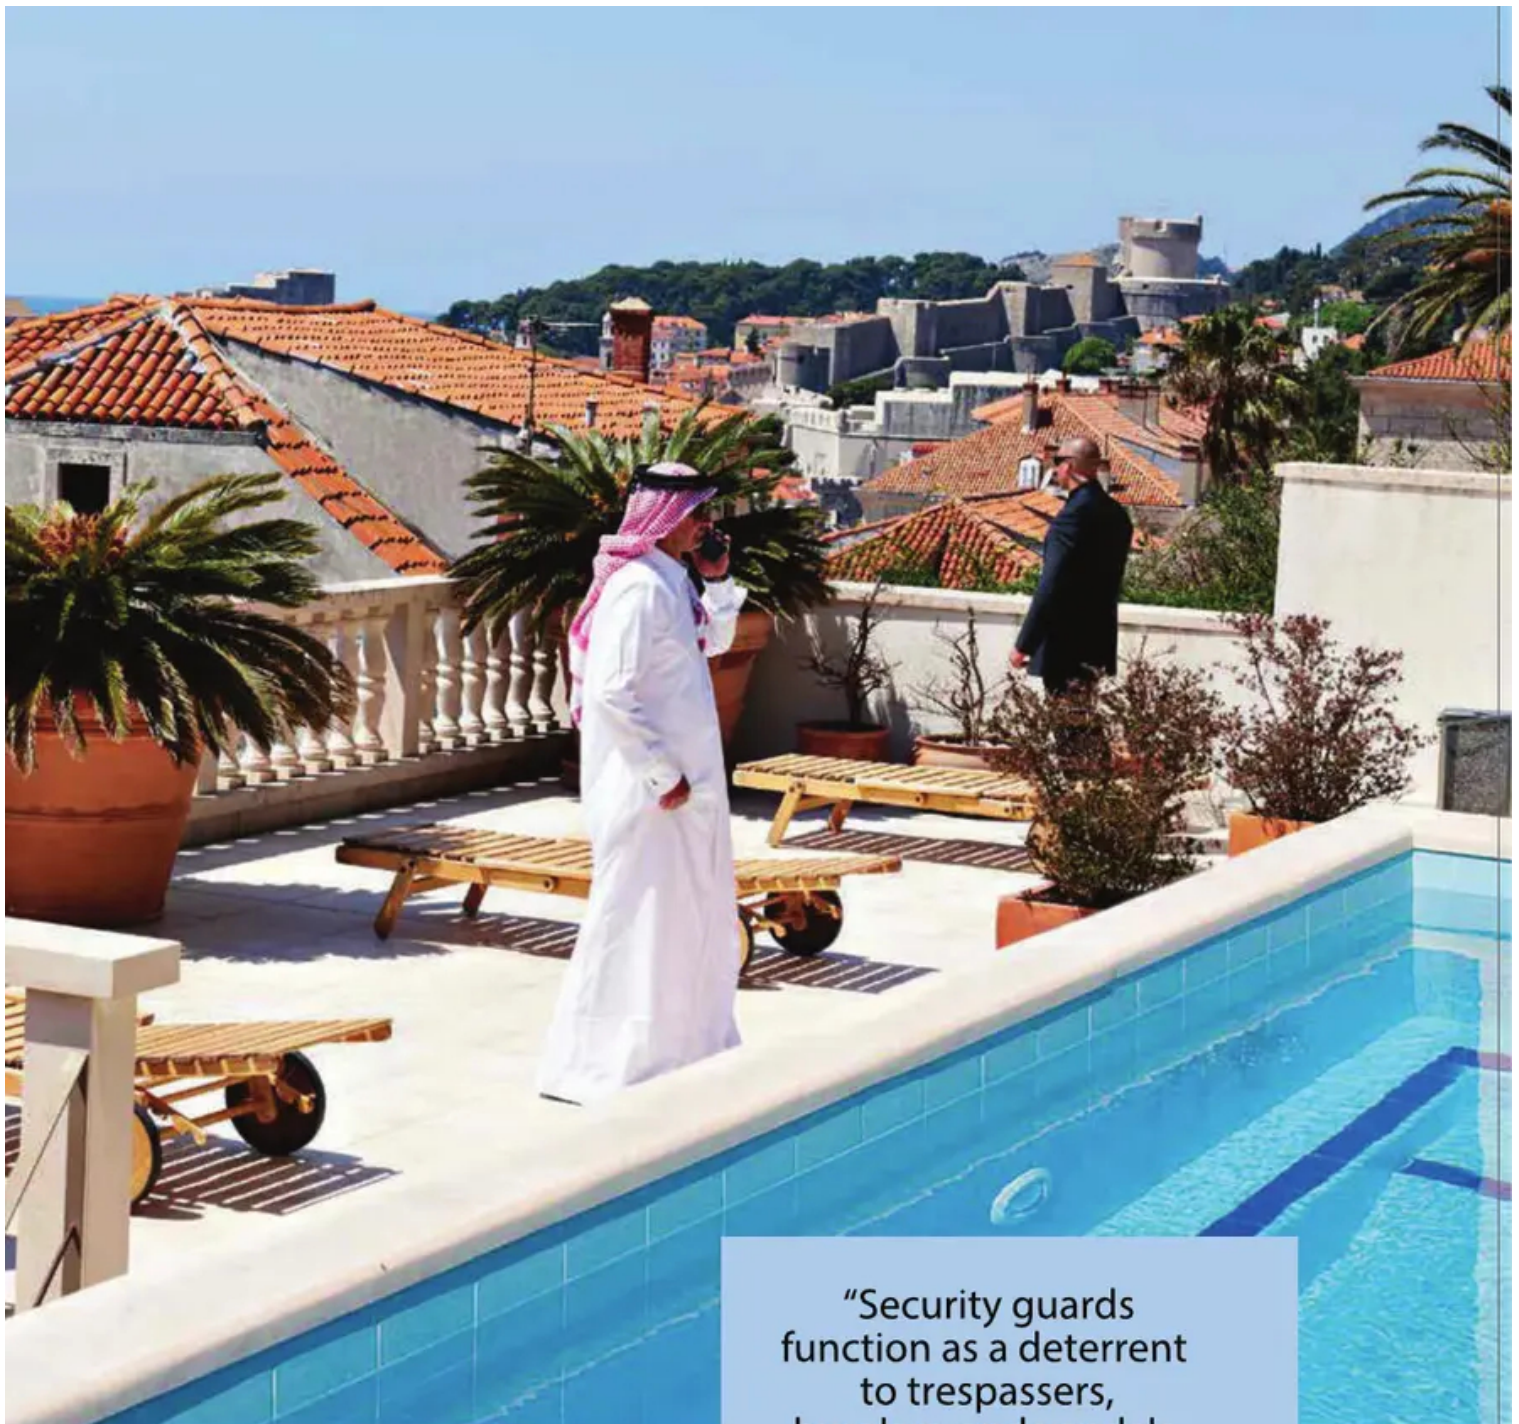

# RESIDENTIAL SECURITY

**M**any famous destinations welcome more Celebrity's and High-Profile Individuals each year. Unfortunately the statistics show that the number of foreign criminals and villa robberies are also on the rise. We guarantee you safety and peace of mind so that you can enjoy your stay without worry. We offer professional security personnel who can patrol the grounds of your real estate, private property, yacht or villa, to provide a security solution tailored to your needs.

Our security services can be deployed as a team or a single security guard to provide security.

Xtreme Security will keep watch over who enters and exits your home throughout the day, as well as who has access to your home. The mission of our Residential Security Team is to provide effective advice and security to the principals with the aim that neither person nor property is unpleasantly surprised and thereby harmed under our watch.

“Security guards function as a deterrent to trespassers, burglars, and vandals when you have the right people and use them effectively.”

Whether you live in a small residence, apartment, multifamily dwelling, or villa, we consult with you on a wide variety of Xtreme Security solutions and can help protect you and your loved ones with advanced home and personal security solutions backed by our 24/7 monitoring service and support. Patrolling and carrying out protection of illegal activity, including theft, trespassing and vandalism and similar illegal acts that threaten the physical integrity and violate the dignity of the person and diminish the value of property, is subject to our protection.

Security guards play a vital role in the tourism industry. They are ubiquitous features of travel – in airports, hotels, resorts, events and important contributors to travelers’ perceptions of safety and security. With the significant threat that terrorism poses to the tourism industry, security guards are asked to play important roles in tourism counter-terrorism functionality.

## HOTEL SECURITY

In practice we are required to provide venue security at hotels more than any other location. Security of area surrounding the hotel, security of the hotel itself, security of the immediate area (suite) where the VIP sleep, security within the hotel when VIP is moving around.

The degree of security in all the above categories is, of course, totally dependent on the assessed

threat. The security of VIP during a hotel stay presents the escort with a challenge, as we are operating in an environment which is not familiar and where we need to rely on other agencies for different aspects of security. A thorough recce, good liaison with all agencies and diligence mixed with flexibility, we will ensure that you have a safe stay.

## SECURITY GUARDS

Security guards are a human presence that adds a significant complication to the plans of

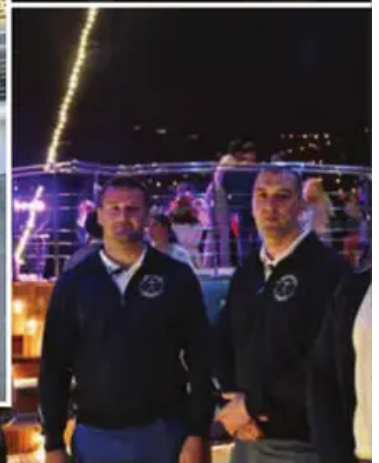

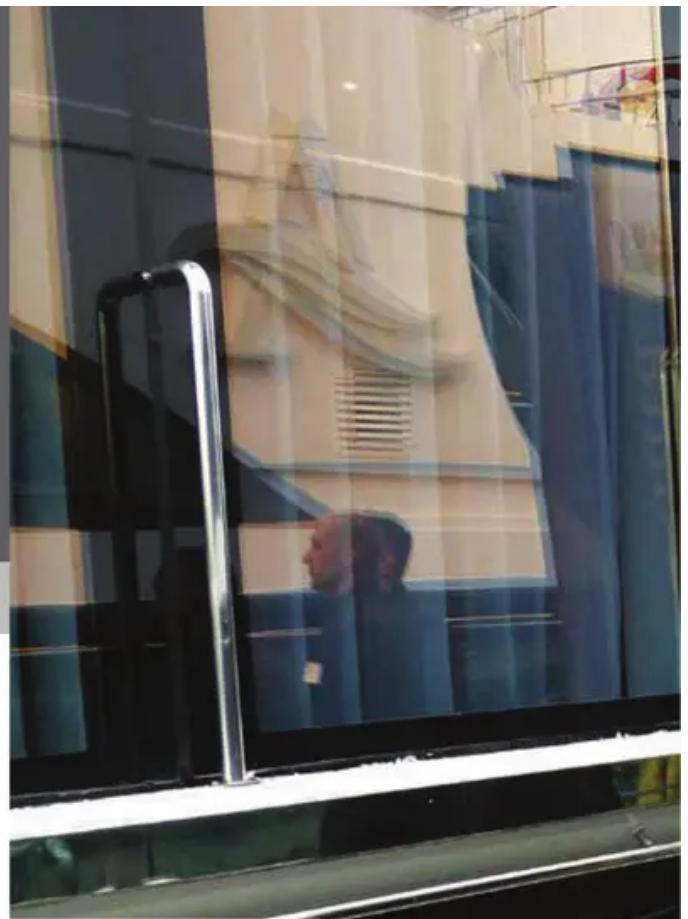

trespassers, vandals and burglars. Unlike home security equipment that is predictable, security guards can alter their routes and routines to make it more difficult for burglars to predict where they will be at any given time.. Guards who are intelligent and well-trained also recognize potential hazards and security risks, allowing you to deal with them before they can be exploited. A good guard reports anything wrong with the property and can fix simple problems themselves while on duty. Guards also ensure that your security equipment stays in working order. Security sys -

tem maintenance is part of the guard's job description to check the status of sensors, cameras and control panels.

If you decide to use security guards for your property, look for guards that have previous security or law enforcement experience. Sign a short-term agreement with a security company if possible to give yourself a trial run before you commit to anything long-term. The key is hiring the right people. Through research and a little trial and error, you can find a team worth investing in that helps ensure your property remains secure.

# YACHT SECURITY

## SUPERYACHT SECURITY

In the current climate, petty crime, illegal boarding's and muggings are the issues that yachts and their owners need to consider.

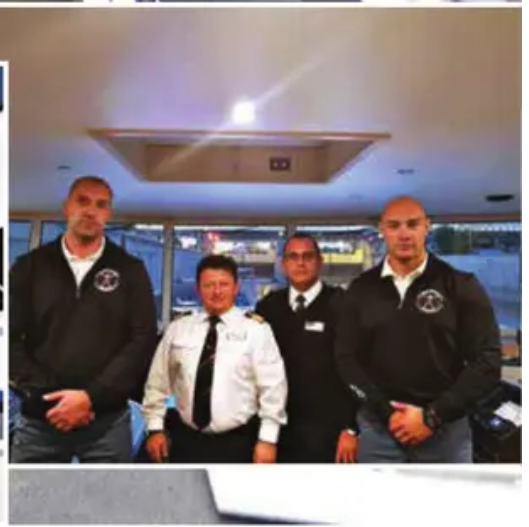

Criminals are aware of the potential rich pickings when it comes to private yachts, and so it is vital that they are not seen as a vulnerable target.

To tackle the modern-day sophisticated hazards, be it theft, vandalism or just unwanted attention, you need the right team with the correct experience and skills. However, creating a real security culture on board yachts is very important when

building the right level of security plan. To be with client throughout their entire holiday, we need to consider how Close Protection Officer will integrate, without disruption to the client, as the objective is to provide and deliver the right level of protection, but also and discretion.

## YACHT EVENT SECURITY

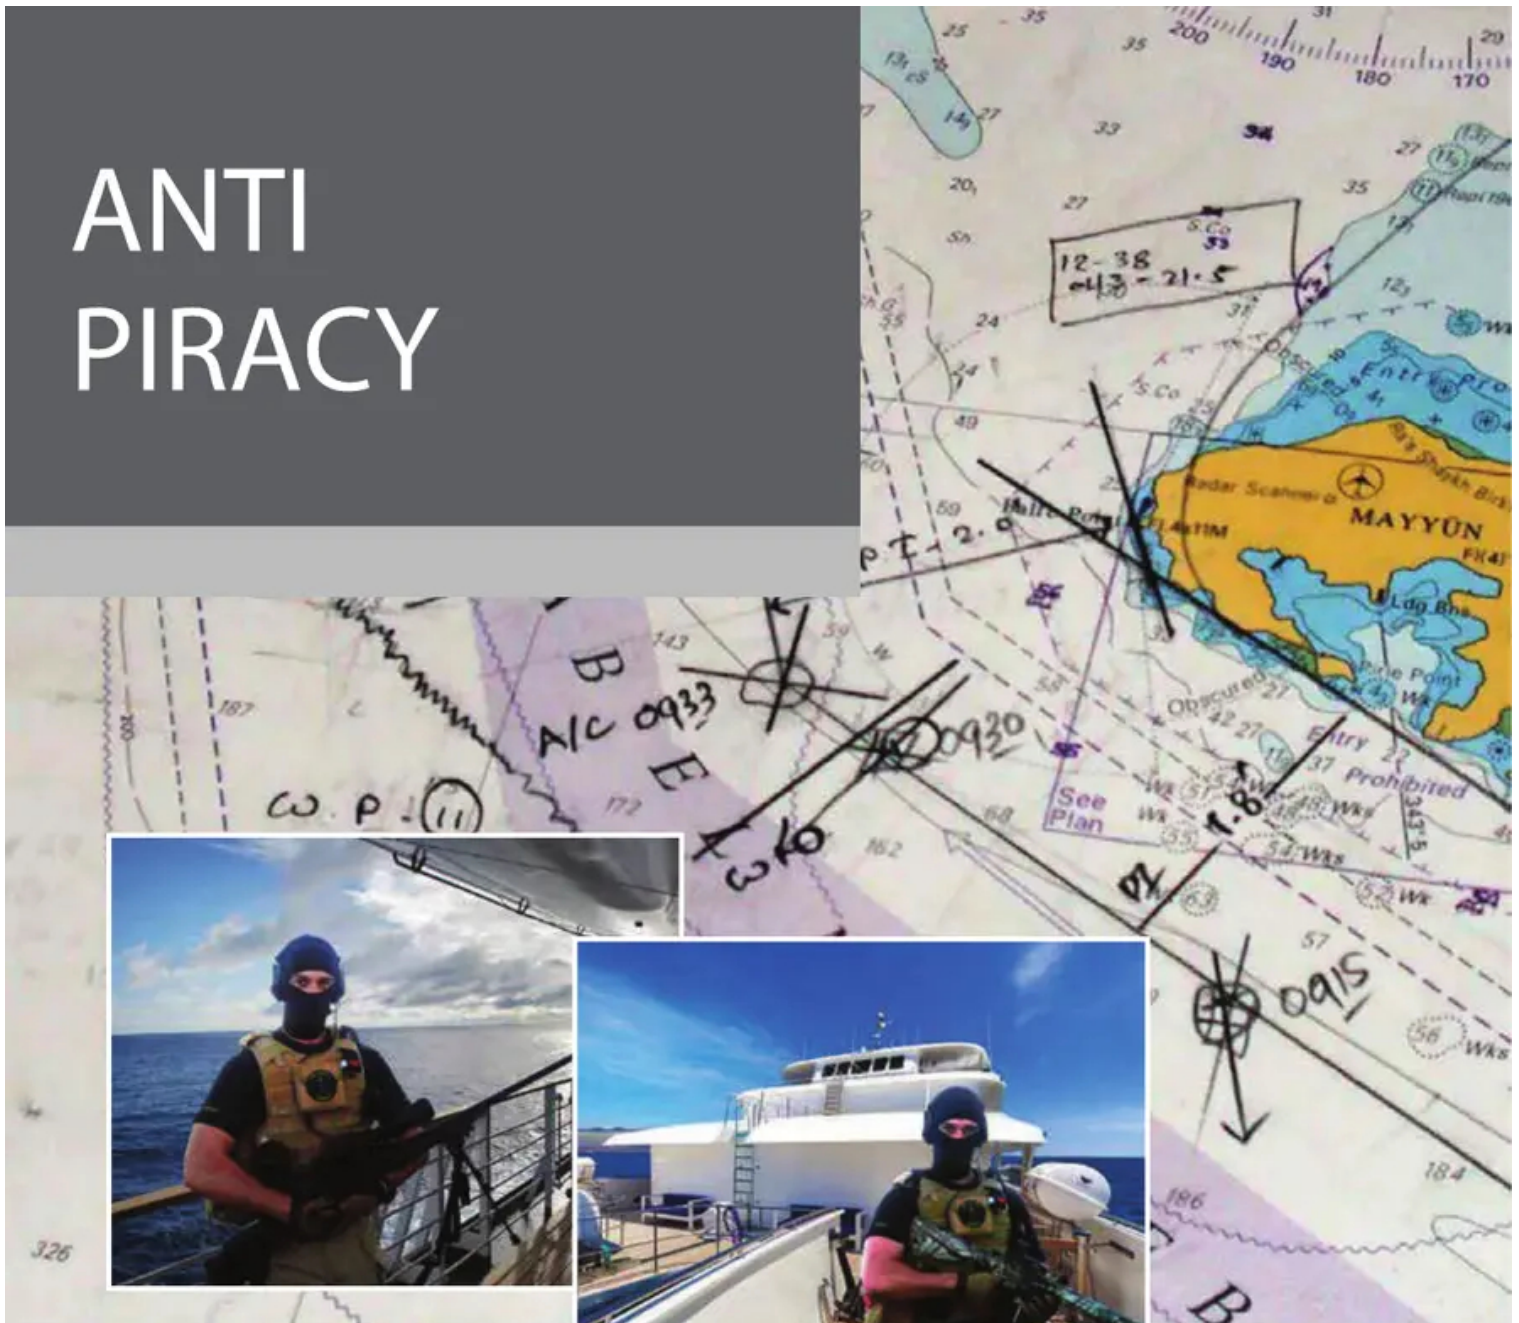

When you organize a yacht event at marina, do you consider implementing an access control officers at your event or do you consider it unnecessary? When you are in marina where there are plenty of

people it's possible that someone tries to enter the yacht, mostly because of curiosity and without any bad intentions, but there are also those passers-by who will take every opportunity to board a yacht and enjoy a free party. Even though these cases are very rare some guests don't feel comfortable and secure without a security guards. The chance of someone trespassing on your yacht is small as there is always someone of the crew on board., however, there are people who will take advantage of every little recklessness of those who control access to the yacht, and usually they are crew members who

deal with all the many other things at the event, and sometimes leave their position unwatched. Implementing Access Control at your event will contribute to the presentation of your brand as first impressions are everything! The image of the brand itself starts with the smallest things. We care about everything, the look and style, charm and charisma, professionalism and skills of our operatives. Our SuperYacht Security services includes shuttle service, access control, assistance for the tenders, health and safety, first aid and firefighting, anti drone services (on additional cost).

# ANTI PIRACY

ISO/PAS 28007-1:2015 certified to provide armed maritime security personnel supply on board of SuperYachts

In a world where hotter is usually considered better, the yachting set head to warmer climes throughout the winter months. Typically, these destinations include countries in the Middle East like Bahrain, Oman, Dubai or Abu Dhabi for a famous F1 Race, but also destinations within Indian Ocean regions, including Madagascar, Mauritius, Seychelles and the Maldives. With the presence of Naval Forces in the Indian Ocean, the threat posed by the Somali pirates has been virtually eliminated due to the war in Yemen and the situation around Iranian coast.

The activities of the Al-Shabaab terrorist group in East Africa and its attacks on tourist resorts have engendered a profound sense of uncertainty and has cast its shadow over neighboring cruising destinations such as Northern Madagascar, Seychelles and Mozambique. Therefore sailing in these areas is still potentially dangerous. To ensure safe pass through the critical area of the Gulf of Aden and Red Sea, we provide armed escorts with ex Royal Marine Commando operatives and best possible equipment.

## OUR OFFICERS

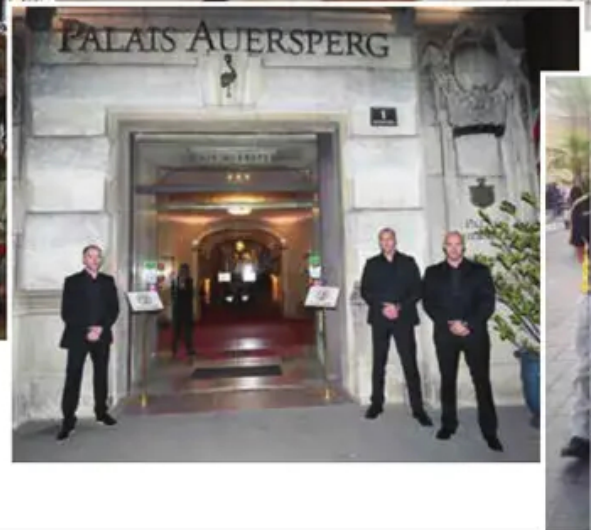

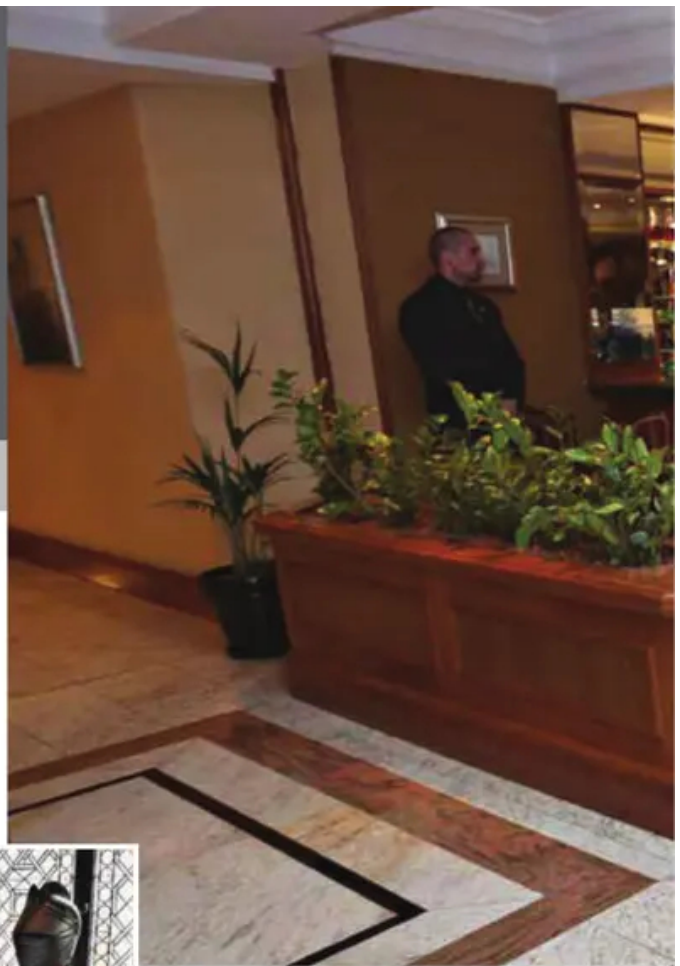

Our manpower is core to our business, and we only employ individuals with an extensive Maritime background, who have experience in providing anti piracy service onboard Super Yachts, thereby ultimately mitigating the risk involved in transiting High Risk Areas.

Our officers are qualified (STCW ISPS) Proficiency in Security Awareness (PSA) Ship Security Officers and Port Facilities Security Officers with a developed understanding of the International Ship and Port Facilities code (ISPS).

Comprehensive crew training protocols are also essential. Crew and guests (if there is a big group of passengers), are instructed on how to act in a crisis.

We will highlight any security procedures and measures that should be taken by the crew prior to the arrival of owners and guests, conduct any necessary training and ensure that security protocols and responses are understood by all. Defining the strategy, the approach and the realistic appraisal of what is needed – how, where, when and why – are the foundation on which security is built.

# EVENT SECURITY

## DOES YOUR EVENT NEED A SECURITY TEAM?

You might think that because your event is small, there's no need for security. However, there are so many things that an event security team will deal with; they're not just there if the worst happens. From a thorough risk assessment of your event to controlling access, quite often just the subtle presence of a security team can put attendees at ease and prevent problems occurring.

## PRIVATE PARTIES

When prospective clients decide to host a private party, some of the key concerns should be a detailed guest list, guest safety, property protection and liabilities. Our supervisors will meet with you and conduct a perimeter inspection. This assessment will be crucial to ensure that your party or special event will have adequate protection and safety to all in attendance. If you need help in organizing your event, who will take care of everything, we highly recommend you an event organization service from our partner D&X EVENTS.

## EXHIBITIONS

Auctions provides the unique opportunity to easily select paintings, drawings, prints, antiques, jewelry, sculptures and bronzes. Security at such an event must be effective and discreet. Attendees should not be distracted by or feel anxious about overly-intrusive security measures. After all, they're here to enjoy the exhibition. Armed guards in every corner and metal detectors at every door are not something that Hermitage Hotel guests would warm to. On the other hand,

noticeable security is a visible and necessary deterrent to potential criminals. Finding the right balance is key.

Watches and jewelry – especially the high-end items—carry great personal significance for customers and guests. They need to be able to get to learn more about these beautiful products in an atmosphere that is secure but never intimidating. The mood should be festive, but we never relax when it comes to security. Getting this balance right is not a simple task.

# CELEBRITY PROTECTION

**X**treme Security Celebrity Protection & Entertainment Security Management Service were formed to provide professional, discreet and effective security service to Clients of High Net Worth & Celebrities Working Within the Entertainment Industry. Unfortunately celebrities around the globe also face an ever-increasing burden of intrusion and disturbance from the paparazzi, the media in general, potential kidnappers, stalkers, robbers and various other threats. We provide highly trained security professionals who will ensure

your safety at functions and during your normal day-to-day life covering both; domestic and international locations.

## DEALING WITH MEDIA

We realize that wherever you are, there will be media presence. We also fully realize that media presence can be just as challenging to monitor, if not more so than crowd control. Our personnel are fully trained on coping with the media presence in both crowds and in traffic situations while maintaining celebrity security.

“In order to ensure your staff and patrons can quickly access areas of your event, it is important to ensure you have the proper amount of staff for each of these access control points.”

**X**treme Security is able to control and secure the biggest events and performances from red carpet events to international press junkets. Our event security service includes door supervising (access control) and control of vehicle access points to the event, crowd management, guest flow and prevention of all the possible conflicts and danger.

Our security professionals are not “Bouncers”. They are trained Close Protection, Health and Safety Officers with Firefighter & First Aid qualifications. Our Door Supervisors are qualified

to react to any type of incident accordingly, to manage and effectively respond.

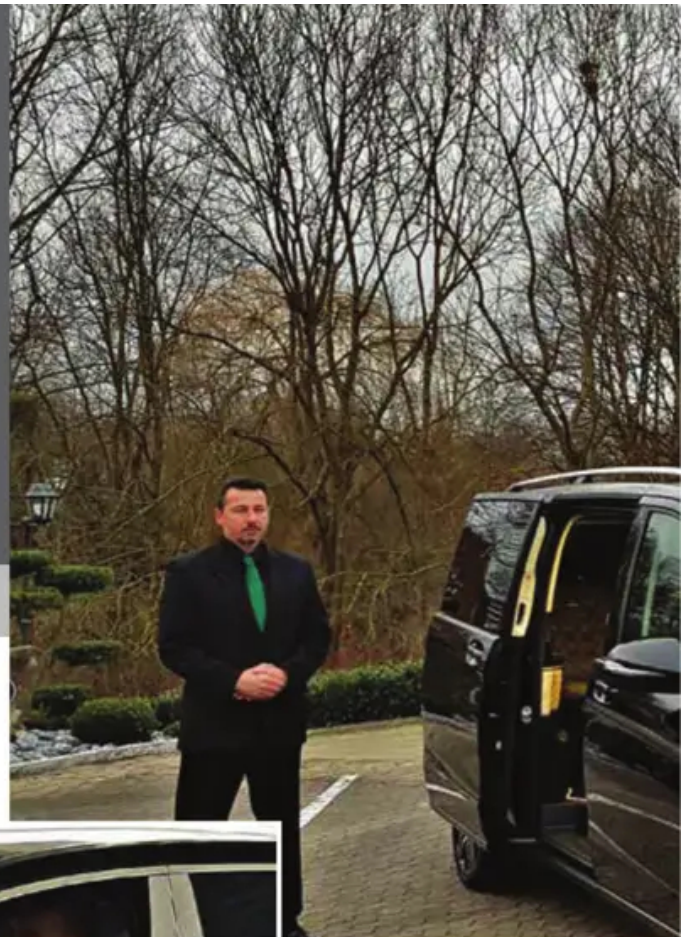

Every incident is the result of a series of events. Incidents of violence are extremely unpleasant for customers. The vast majority of customers come out to enjoy a good time. Some customers, however, have unreasonable expectations of the service. For example they may expect to get straight into a venue without queuing. When they find they have to queue, they become frustrated. The situation will deteriorate if their expectations are not managed properly. Conflict management

is about managing this and many other everyday situations. Conflict management is a problem-solving approach to dealing with difficult situations. Our Door Supervisors can recognize the signs of potential risk and conflict before they become a real threat, and are able to respond in a way which will prevent the situation from escalating. They are proactive by preparing themselves to deal with any conflict situations that may occur at your venue. A Door Supervisor greatly reduces the risks in the job. Reducing the risks benefits both the Door Supervisor and the venue, and ensures that the

customers can enjoy a safe night out. Good communication skills are essential in defusing conflict and aggression. However, Door Supervisors can be more vulnerable when they underestimate or do not realize the threat presented by the situation. As a Door Supervisor sometimes it is impossible to completely avoid conflict and aggression so it is vital for us that our Door Supervisors understand how to deal with it when it happens. Our security professionals tend to respond quickly to high-risk situations where the threat is obvious.

# SECURE TRANSPORT

All our drivers  
are members of  
International Security  
Driver Association.

"With a Luxury Cars  
and Protection  
Trained Drivers,  
Xtreme Security  
Secure Transport is  
the principle choice  
for the Elite travel."  
"

## TRANSPORTATION WITH LUXURY VEHICLES

Treat yourself, your family and your entourage  
with our luxury transportation service.

With a Luxury Vehicles and Protection Trained  
Drivers, Xtreme Security Luxury Transport is  
the principle choice for the Elite travel. From a  
standard airport pickup or drop-off, to a complex  
secure and discrete VIP movement, whether it's  
a trip from home to office, or transporting you  
and your valuables from one location to another,  
Xtreme Security Luxury Transport is available 24

hours a day.

We fulfill the need for first-class travelling, which will reflect the appropriate impression of your company, and the importance you put on effortless and professional service. Our reliable security drivers are at your service to meet your every wish in a comfortable and professional manner. You can be confident in the knowledge your driver is an expert in security field and has been trained to react to all type of threats. We also realize that you may be traveling with members of your family or more companions, so we are capable to provide transportation service

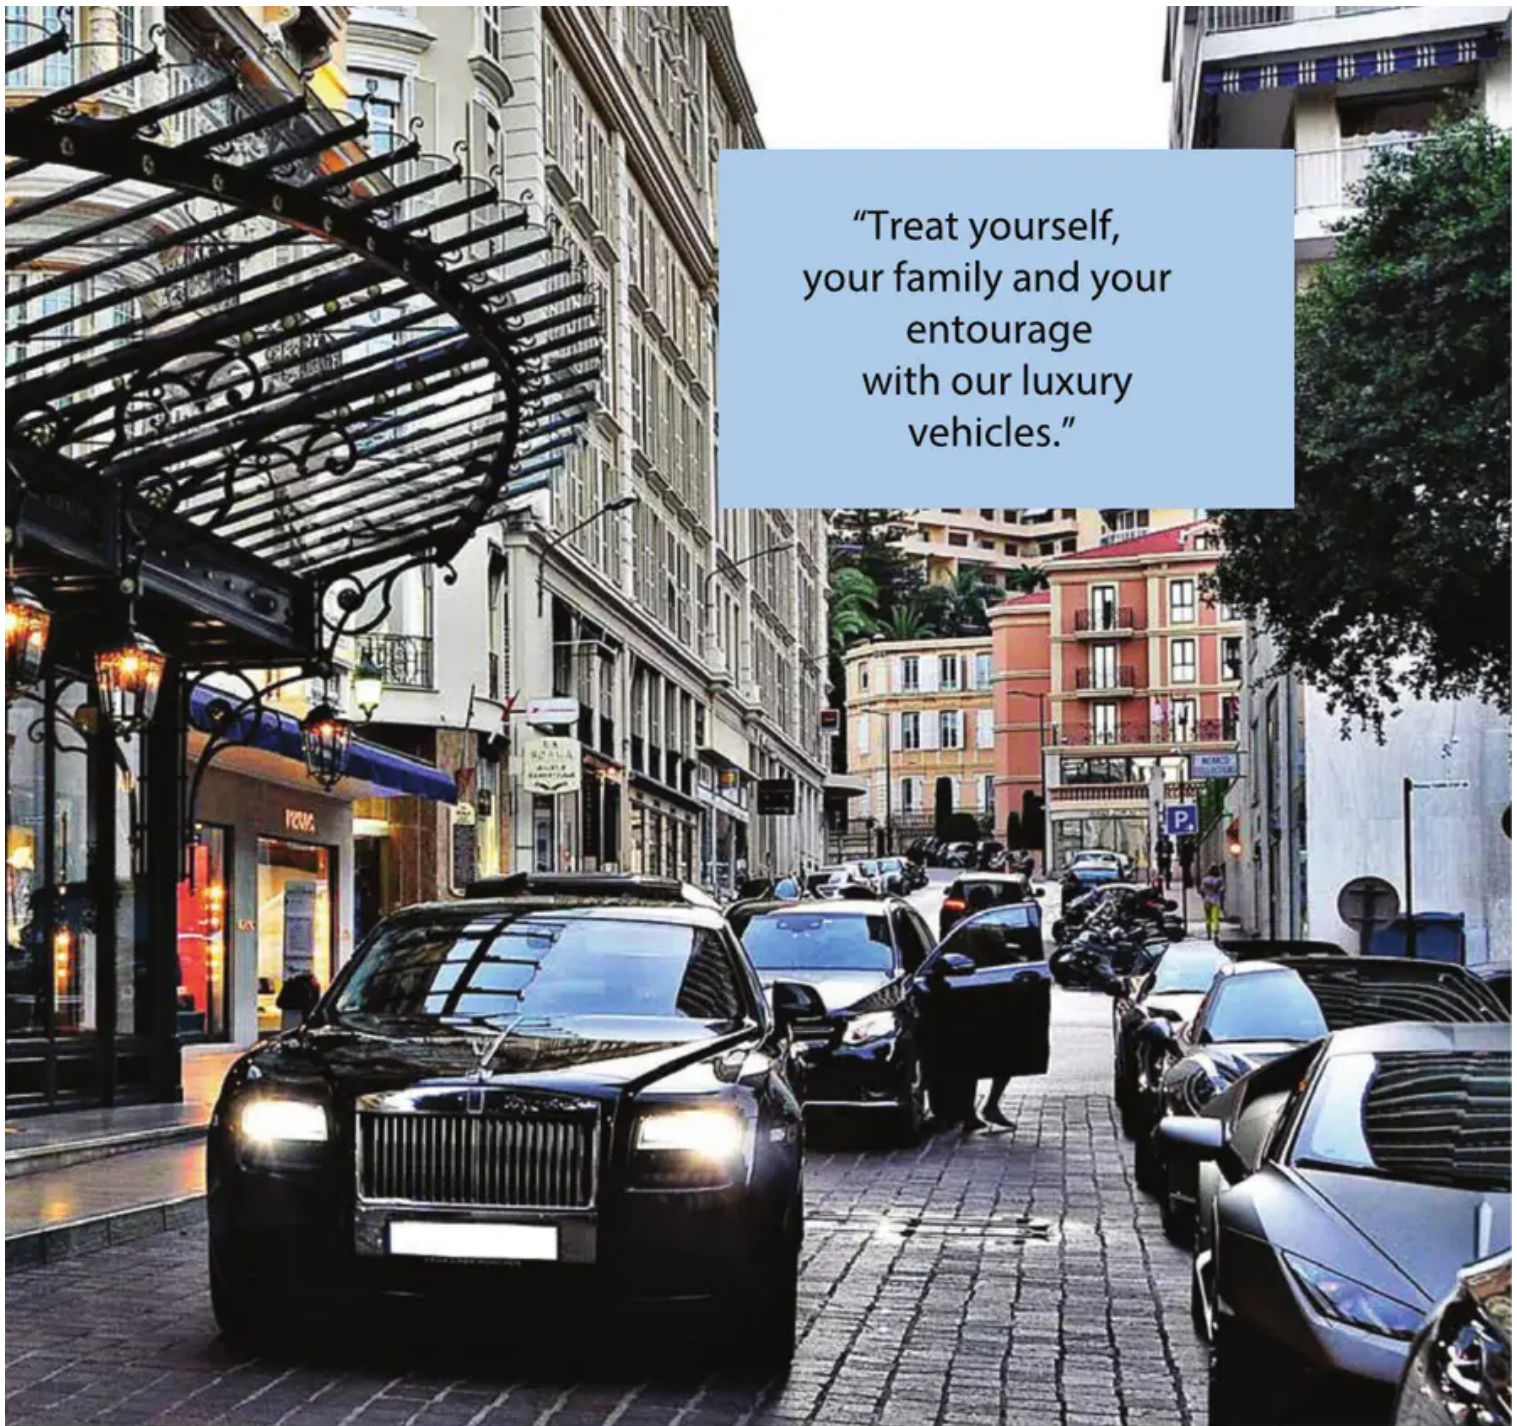

to parties containing multiple members. Our Executive Protection Drivers offers a reliable and discrete security driven service for the Exclusive Business Professional and Personal VIP Traveler, which will represent your life style and need for comfort. We can plan your mode of travel whether you prefer a standard vehicle, limousine, Minibus or JetVan. We provide transportation services for the following: Conference/Trade Show Transportation, Special Event Transportation, Precious stones/gems transport, Airport Shuttle Service and Cargo Escorts.

## OUR PROTECTION TRAINED DRIVERS

Are you looking for a professional trained protection Driver rather than the standard Taxi or Limousine service? The security driver employs a broad skillset that combines evasive and defensive driving training, vehicle safety inspection and foot patrol and surveillance. Duties may include, but are not limited to, vehicle patrol of exterior areas of given locations, foot patrol of interior/exterior areas of given locations,

surveillance and reporting any suspicious activities, proactive response to any emergency, enforcement of procedures and rules for the safe transportation and well-being of the principal. All of our Executive Protection Drivers are highly trained professionals who have attained certification on completion of a Protective Driving course. By making the decision to employ our Executive Protection Drivers, you can be sure of arriving at your destination feeling relaxed, without suffering the anxiety and ill effects that can sometimes be caused by untrained or

"Treat yourself,  
your family and your  
entourage  
with our luxury  
vehicles."

unskilled drivers. You can also be confident in the knowledge that your security driver is an expert in his field and has been trained to react to the ever changing road conditions and all weathers situations. Most drivers react/respond to the information they receive as they drive. Their actions are not planned, only reactive. Our drivers are instinctive, thoroughly plan all routes, and think before taking action in emergency situations. An instinctive driver is one that constantly plans and predicts what action to take based on information received in order to avoid or manage threats, minimizing the chance of damage and/or death.

The effects of chemical cocktail while driving are about five time as strong in a split second then in other situations. There is no denying the effects of sensory overload. Sensory overload inhibits the driver from making the best driving judgments in frightening or threatening situations. The effects of the chemical cocktail when shocked or surprised by events can be devastating. Your body immediately experiences the muscle tightening, tunnel vision, time distortion, etc. Failure to manage the effect of sensory overload, the chemical cocktail can be fatal!

Our staff are capable of running any other duties whilst on task such as transportation, family and media liaison to allow the celebrity to focus on what they do best!

## EXECUTIVE PROTECTION

Executive Protection (EP) is a security specialty focused on safeguarding the life, health, time, reputation, and peace of mind of corporate executives and others who face elevated risk. The task of keeping key personnel safe

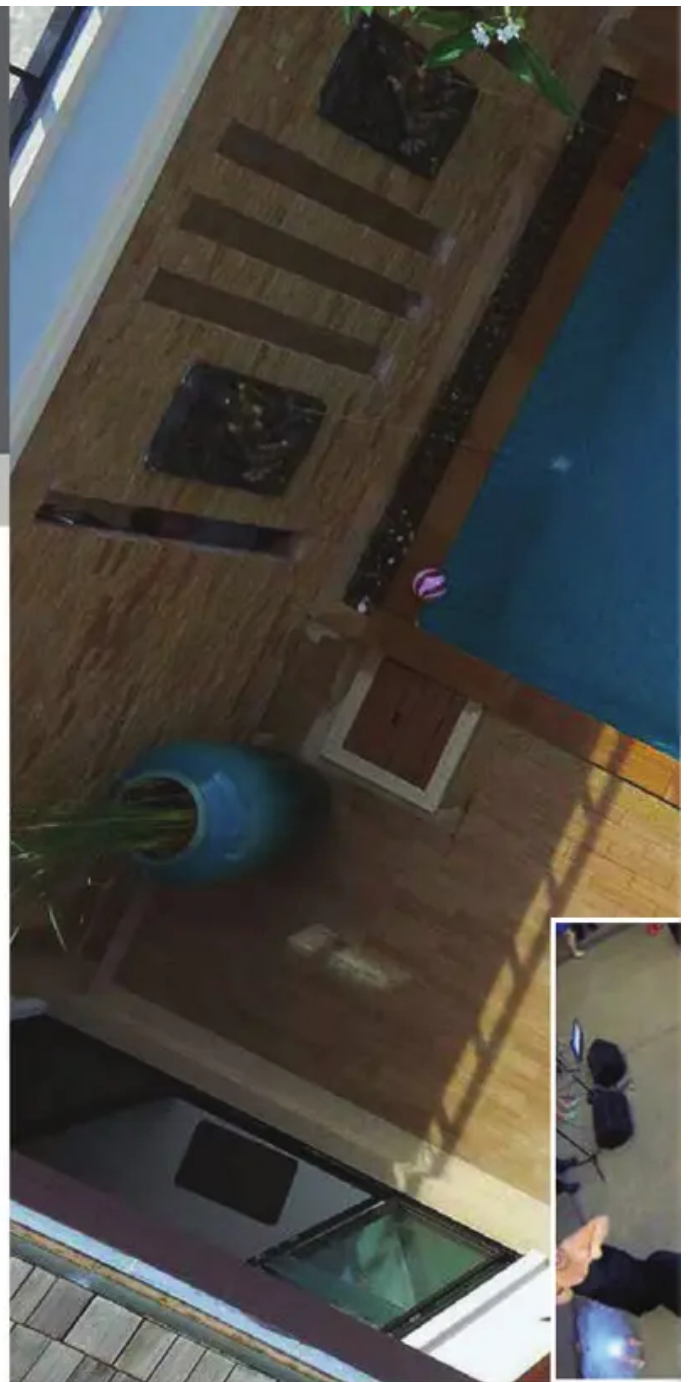

from intentional and unintentional harm—is a widespread, recognized specialty in the security field. Its purpose is to safe-guard people who face an above-average level of risk or whose security is especially important to an organization.

In today's complex threat environment, the challenges to executive protection professionals have never been greater. Therefore there are different types of executive protection. Depending on your concerns and goals, we will provide you with the security that best fits your needs, be it covert, or overt. The tool needs to serve the goal, not the other way around.

# COUNTER-UAS ANTI-UAV

**MYDEFENCE**

We are honored to become an official reseller and that we partnered with leading manufacturer of anti-drone devices which you can find on the market today; MyDefence.

MyDefence was founded by military officers with insight into military operations and advanced radio technology. They are specialized in developing, producing, and selling anti-drone products for detection, tracking, and jamming of Unmanned Aerial Systems to mitigate the threat of malicious drones.

At MyDefence they realize the terms "Interop-

erability" and "Mission Critical" are lifesavers. Around these notions, we work our projects in order to accommodate the VIP needs for flexibility and scalability.

By listening to our end-users and combining their learnings with our partners technology, we are producing innovative and versatile Counter UAS solutions for any type of scenario.

If the regulations in a particular country allow jammers, we would use their jamming technology to disable frequencies or signals of any intruding drone in the area as well. We are fully equipped and highly trained professional with technological support to detect any looming threat.

\*A UAV is an Unmanned Aerial Vehicle, the drone itself. A UAS is an Unmanned Aircraft System which includes the drone, controller and any supporting systems and software.

**IN DRONE COUNTER MEASUREMENTS DEVICES,  
OUR PARTNER IS THE WORLD LEADING.**

Commercial drones operate in FRQ bands 433MHz 915MHz 1.2GHz 2.4GHz 5.2GHZ and 5.8GHz, and we can detect all of these bands and let the security guard know that a drone is approaching from up to 3 km away.

With the detector connected to the jammer, the jammer will create a fence up to 1km away, meaning the drone will not come too close.

MyDefence jammer has a jamming algorithm that counters the FRQ hopping drones, meaning a drone senses FRQ noise from the jammer or

other environmental interference on ex. 2.4GHz it will switch FRQ to 5.8GHz and continue flying, while the algorithm in our jammer counters that and jams the drone anyway.

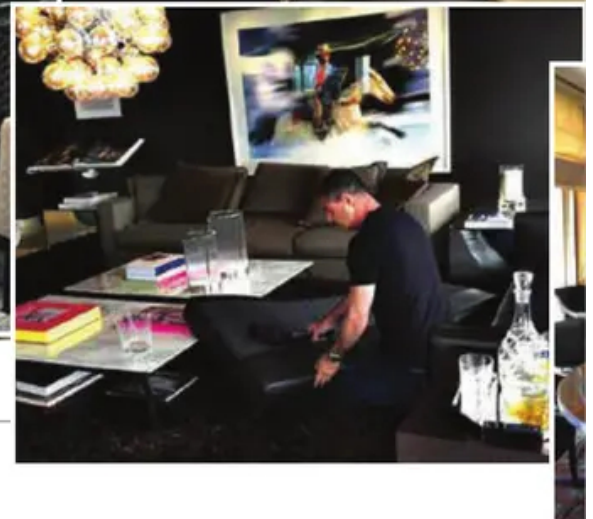

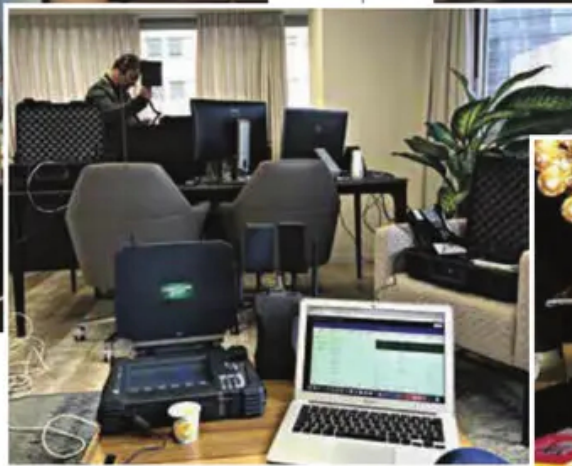

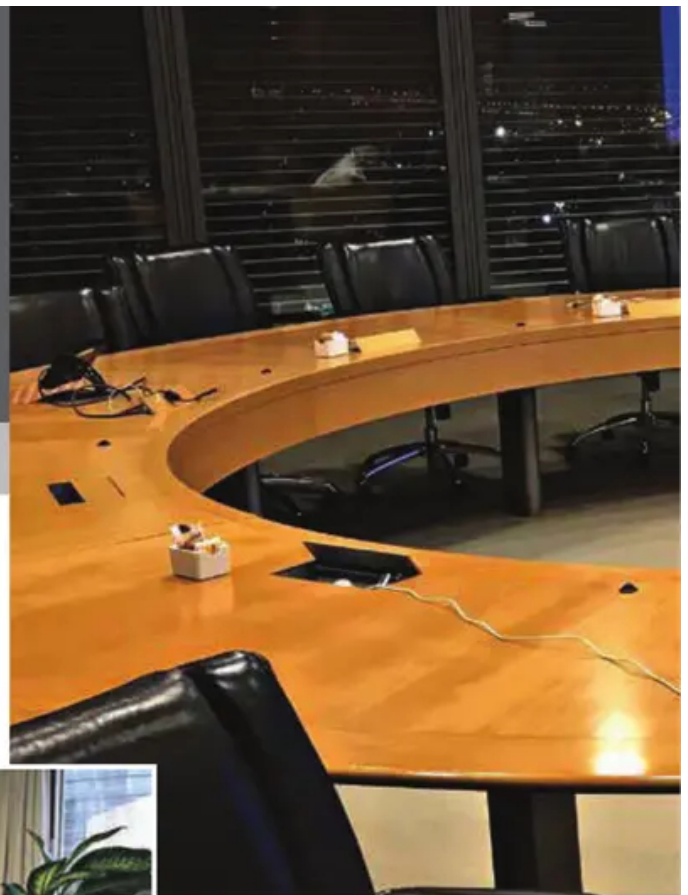

With a conventional jammer, the drone will sense the interference from the jammer and switch FRQ band and leave the jammer useless.

At Xtreme security, we are trained professionals certified with MyDefence equipment usage and technologies for our clients anywhere including a yacht cruise for an event organization or for additional residential security.

\*For purchasing MyDefence equipment contact us and we would work out a plan and provide you a 10% discount. If you wish to contact them directly, be free to use our discount by mentioning us.

# TSCM

## TECHNICAL SURVEILLANCE COUNTER MEASURES

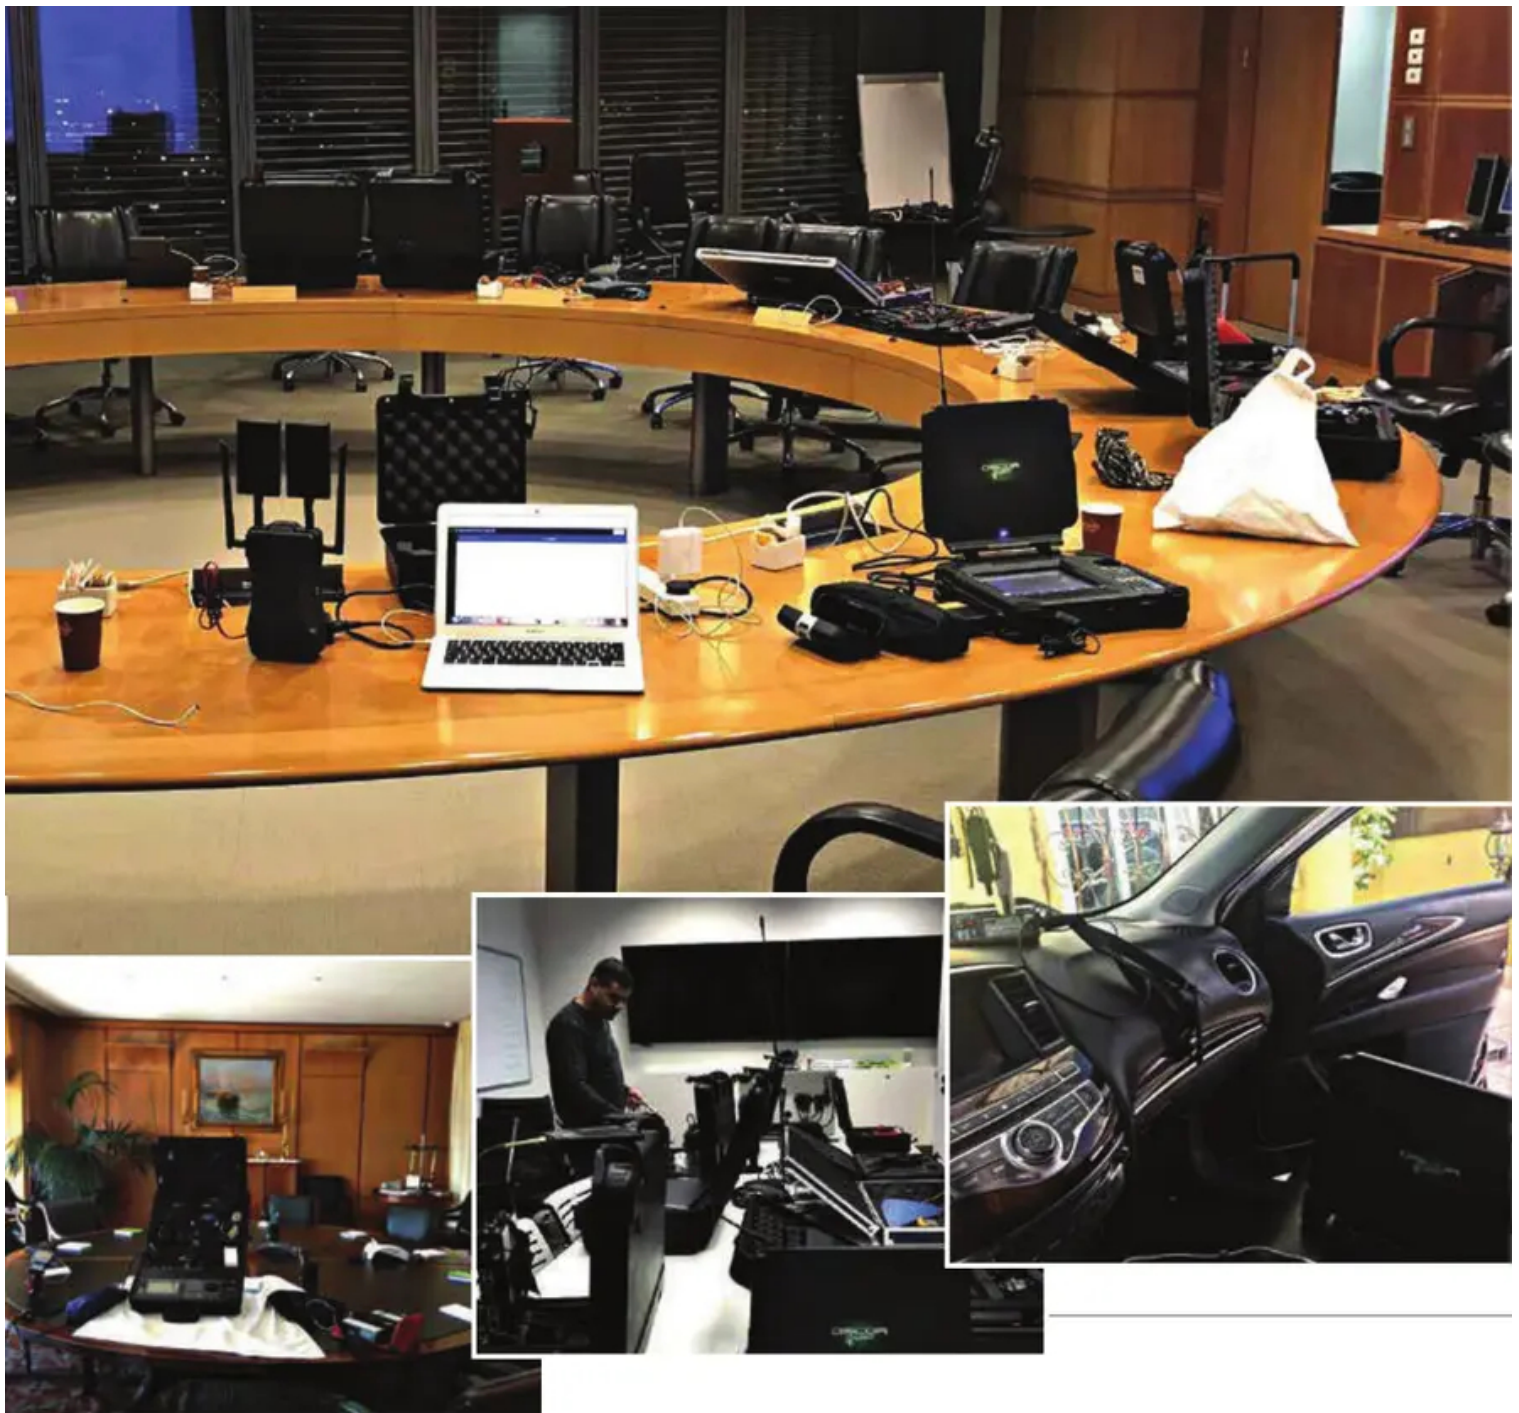

Modern eavesdropping espionage devices are relatively cheap and easy to obtain online. Whether commercially or privately, if you have concerns that you are vulnerable to a technical attack at your place of work, home or in your vehicle, we are able to alleviate those fears by conducting a full TSCM sweep. We are one of the very few companies in Europe that use radio frequency (RF) mapping and highspeed capturing to identify the latest digital burst and cellular transmitters. TSCM involve the skilled use of specialist, technical equipment and training which enables a comprehensive physical investigation of an area and a thorough analysis of the electromagnetic spectrum. This investigation will neutralise the threat posed by

any eavesdropping devices or electronic 'bugs' which have been placed at or located near to a specific target area.

A bug is a technological means that can absorb information in a given environment, and it can also store or transmit information to another location via wired or wireless transmission.

There are many different types of listening and espionage equipment. We would test, detect and locate active wireless transmitters of all types and in all spectrum. "Dormant" transmitters, transmitters on communications lines, computerization and electricity, IR-laser transmitters, 3G transmitters, wifi, bluetooth transmitters, detection of GSM transmitter in broadcast mode and STANDBY

mode, microphones, recording devices, hidden cameras, cross-connections in the infrastructure, tracking systems, etc.

A proven professional execution of TSCM tasks requires control of knowledge areas such as radio frequency, electricity, computing, fixed and mobile telephony and many more.

## PRODUCTS

### COUNTER SURVEILLANCE DEVICES

Hand-held Jammer, Desktop-held Jammer, GSM Investigation Device, Encrypted Mobile Phones, Encrypted Laptops, Untraceable SIM cards.

### INTELLIGENCE GATHERING
